

# Guideline to install and setup Metamask Wallet

Get ready for the Project

Guideline to install and setup Metamask Wallet

1. Select your favorit Browser - Metamask works with firefox or google chrome Browser

2. visit the webpage metamask.io/download and add the metamask extention to your browser

#### follow this step's

**Google Chrome** 

(recommended)

Guideline to install and setup Metamask Wallet

click on "create a new wallet"

select your choice "no thanks" or "i agree"

select a save and secure password

Guideline to install and setup Metamask Wallet

#### secure your Metamask Wallet with your private 12 Seed Phrase

click on "secure my Wallet"

click on "Show your seed Phase", save these 12 words as a screenshot or print them out and keep them safe then click on "next" confirm your security by entering the missing words of your seed phrase

Congratulations

1. click on "done"

English

2. click on "next"

You have successfully installed your personal Metamask

now you are ready to setup your Metamask

## These are the following step's

- 1. Import payment Tokens on Ethereum Network (USDT and USDC)
- 2. adding the Polygon Network
- 3. Import payment Tokens on Polygon Network (USDT and USDC)
- 4. adding the Binance BNB Network
- 5. Import TicoRico TIRI Token for receiving the Token

Guideline to install and setup Metamask Wallet

#### How to import Token's on Ethereum

click on the right Site on "+ import" (see red marking)

Guideline to install and setup Metamask Wallet

#### **USDT Tether**

|   | Import         | tokens ×     |  |

|   | + Add a custom network |                             |
|   |                        |                             |

search the Binance Network by entering "Binance" and click on "add" and confirm

finally click on "approve" to confirm the network

Guideline to install and setup Metamask Wallet

import the TicoRico "TIRI" Token to your Metamask Wallet

TIRI Token Contract Adress 0x7C640E2985538202a7be1dEB3f0221Cf96AF5cef

Click on the right Site on "+ import" (see red marking)

Click on "Custom token" and add the TIRI Token contract address and click "next"

finally click on "import" to import the TIRI Token

Guideline to install and setup Metamask Wallet

Now, you are ready to receive the TicoRico TIRI Token and participate from the Pre Sales Phase of the TicoRico Project Nature Blockchain Project

your Metamask setup was successful

Please Note, you can select your favorite asset and buy it directly via the metamask or transfer the values from your own exchange. When paying with USDT or USDC, please take the corresponding network fee into account. This is always calculated in the network token (Ethereum or Polygon) and must be available as an asset.
